

# Dental Photography

## IN OFFICE TEAM TRAINING

High-end photography in aesthetic dentistry is a paramount to clinical record taking, lab communication and practice marketing. For those offices that may struggle to capture the highest quality images, this program is designed for you. This course will cover the basics of camera equipment and their use, the foundations of clinical and portrait photography, and help your team develop an eye for aesthetics. We will help you set up a photo studio and provide you with the expertise to fully utilize it.

### COURSE OBJECTIVES:

- Interactive Learning: Each team member will have the opportunity for hands-on experience with the camera, ensuring full comprehension of techniques.
- Equipment Essentials: Discover the necessary tools and accessories for achieving professional-grade dental photography.
- Studio Setup: Learn how to use your space for a functional studio.
- Personalized Guidance: Our instructor will provide tailored recommendations for photography supplies and assist with setup.
- Full Day Course: We dedicate ample time to ensure every participant leaves feeling confident in their photography skills.

### DETAILS:

- Prior to the course, we'll provide a list of photography supplies to purchase or utilize your current equipment.
- Lecture & Hands-on - We will present a "dental photography basics" presentation followed by practical application.
- The tuition for this course is \$1,500 plus travel and hotel accommodations for the instructor.
- We will provide 6 CE credits - Lecture & Hands-on Method
